

我的眼睛说

我的眼睛说天是灰色的

路很长

水很深

黑更黑

我的眼睛说两个人在一起

两双眼睛

四个凸镜

(普及湾大学 三年中文学生 安景俐)

我诗第一部分的意思就是我的眼睛会辉映我看的一些东西；如果一个人在看我的眼睛，他会看我看的東西因为我的眼睛辉映。我诗第二部分的意思是我跟一个人在一起。我的眼睛会看那个人。可是，如果两个人在一起，两个人在看世界上的很多事情。“凸镜”的意思就是两个人在一起会看会知道的事情比两个人分开会看会知道的事情多。

The meaning of the first part of my poem is that if someone is looking at my eyes, or into my eyes, then they can physically see the actual things that I see because of the reflection in my eyes. The second part of my poem is more abstract, because I am talking about two people who are together, and how together there are two pairs of eyes, but what is important is that since the two people are together then they can see and understand more things in the world than if they were apart. This means that other people

can help you understand certain things that you may not understand or see, and you can do the same for them. That is the whole meaning behind the “convex mirror,” because the way a convex mirror is shaped in an outward and rounded fashion allows you to see more than what is just straight in front of you.
